

RallyPro

Exceptional fuel for any type of turbo charged engine. Specially developed for turbo engines, forced to regulations at intake flanges. The exceptional quantity of oxygen and the high octane level makes it possible to obtain an optimal motor efficiency. A must for rally cars with the constraint of an intake flange and wanting to maximize their performance.

Technical Data

Property	Typical Value
RON Octane	110.4
Motor Octane	100.5
Specific Gravity	0.765
Oxygene	10.1%
Leaded	NO
